Business Owner Access (BOA) is *Enrich's* business intelligence module. It provides a central repository of key business indicators with an easy-to-use, flexible, customizable reporting tool for Business Owners and Management. Whether you're the owner of the company or the owner of a business segment, BOA provides real-time, meaningful key-indicators, developed by leaders in the maintenance industry, that are easily customized to your unique business environment.

Executive Reporting, Delivered

Understanding your company's operating position will never be an issue again. BOA's intuitive layout, user tools, and variety of reporting options will provide instant visibility of key performance indicators and operational exceptions, allowing management and executives to make real-time, pro-active decisions.

With BOA you can: drill in and out of reporting data, change the search and filter criteria, view data in a graphical presentation, and easily schedule reports resulting in more timely, and informed business decisions.

BOA provides accurate reporting data, instantaneously—when you want it and how you want it.

Functional Area Dashboards

Users can access numerous pre-defined dashboard portals, which are collections of reports viewable on a single screen, with summary results that can be drilled into.

Web Application

BOA was developed using web-enabled tools, allowing users to access their information with any Internet browser, anytime, anywhere; no additional software or configuration is required. Initial deployment is simple and, with the easy user interface, any technical concerns are eliminated.

Integrated Reports

BOA eliminates the need to run multiple reports to see related (or unrelated) data. Reports can be linked together, allowing users to easily drill from one report to another with a single click of the mouse.

Customized Results

Report filters, columns and layouts can be easily defined with user settings, so you can quickly add or remove data elements to customize your view.

Go Green, View and Share Online

Since the reports are generated online, they can be sent via e-mail, and can be seen and proofed on screen, eliminating unnecessary printing.
